

# Magnetized by ideas – fascinated by possibilities.

Fixing perforated plates for tools etc.

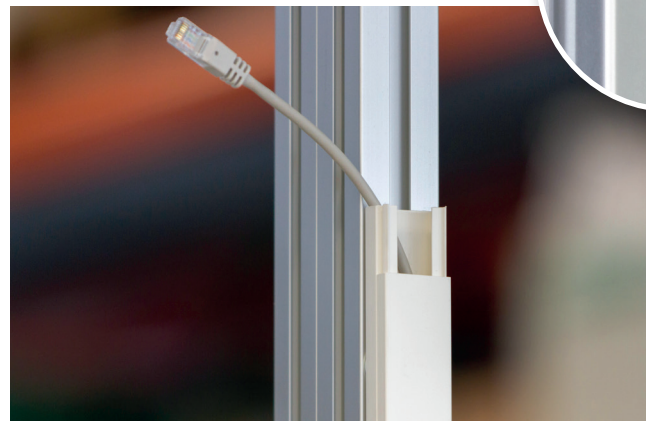

Attach information signs

Attach additional lighting

Attaching documents or posters

Cable ducts

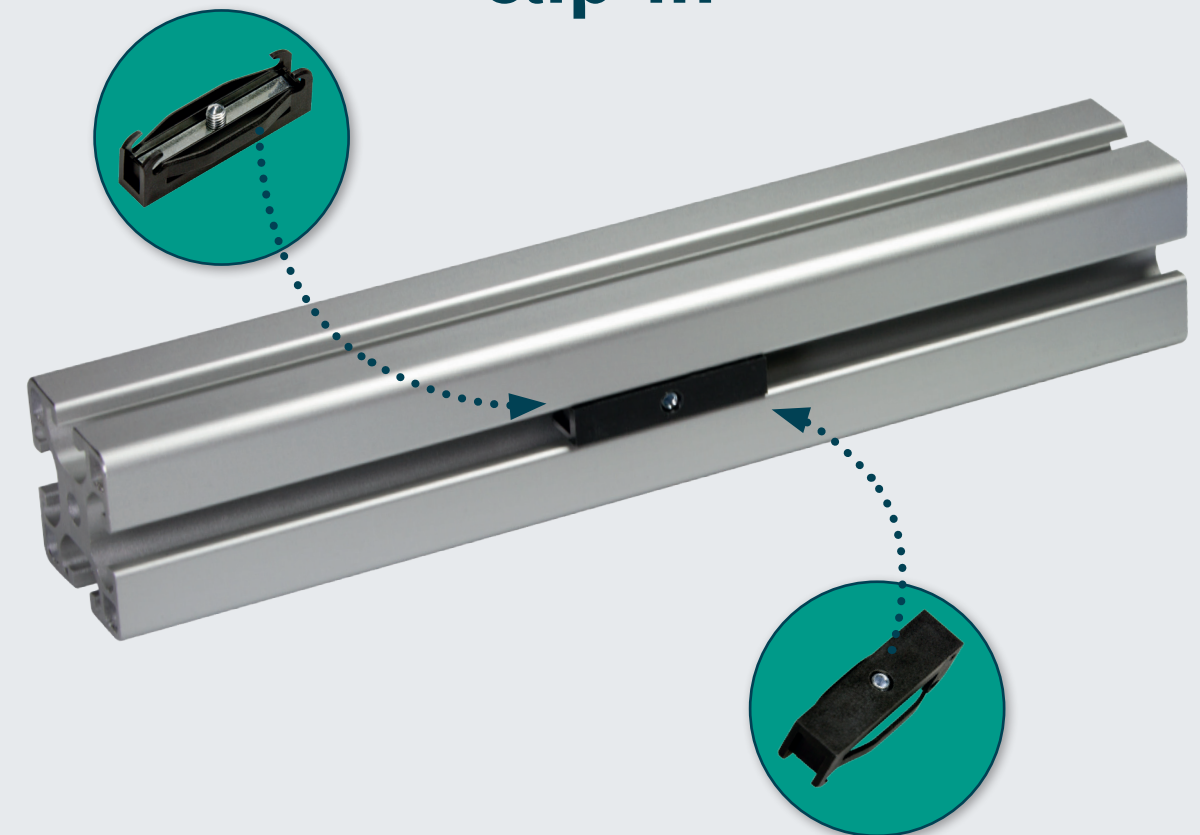

Swing doors

BRUGGER magnets make aluminum profiles „adhere“. Whether at assembly workstations, at trade fairs or for profile constructions in general - the profile magnets for clipping in open up many new fastening options!

Do you need ideas? Attach documents such as safety instructions, instructions or plans directly to the exhibition stand or assembly table. Cover machines with grilles or metal sheets, or attach an enclosure, splash guard or additional lights to the assembly table.

# Magnetic solutions are our expertise.

Application example for an assembly workplace

## The perfectly organized workplace

These magnetic systems make it easy to attach panels, covers, tools and accessories to profile constructions. Assembly workstations, for example, can be individually designed. The profile magnets can be easily clipped into the groove, are freely movable, can be fixed in place using the grub screw and can also be easily removed again. The profile magnets lie almost flat and have a closed, smooth holding surface. The magnetic core is protected by a plastic cover, so there is no accumulation of metal shavings and no scratching of surfaces.

### Fields of application:

- Exhibition stand construction
- Store fitting
- Equipment for assembly or testing workstations

## Profile magnets for trade fair construction or store fitting

Creativity and quick implementation of various solutions make aluminum profiles so popular. Until now, however, there was no ideal way to attach magnets to them. The aluminum profile magnet system can be used with profiles from Bosch or Item.

Your store or exhibition stand has a not inconsiderable influence on how your potential customers perceive your offer. That's why you need to present it effectively. But permanently fixing design components and advertising materials is rarely advisable. Because tastes and trends change too quickly. With the help of magnets for shop-fitting, trade fair construction and product presentation, you can remain flexible and save money. Discover our solutions now to impressively display your products and services.

Profile magnet backside

Profile magnet front side

### Advantages:

- Subsequent, frontal attachment of the profile magnets in the groove without dismantling of the profile system components
- Freely movable by sliding in the groove
- Fixeable by a threaded pin
- The profile magnets can simply be levered out of the strip again
- Operating range up to 120 °C
- Closed adhesive surface
- Scratch protection due to plastic cover
