

Magnetized by ideas - fascinated by possibilities.

Extra strong disc magnets for glassboards

Strong cylindrical magnets for whiteboards

Strong design magnets in various shapes

Strong handle magnets with plastic housing

Round office magnets in many colors and diameters

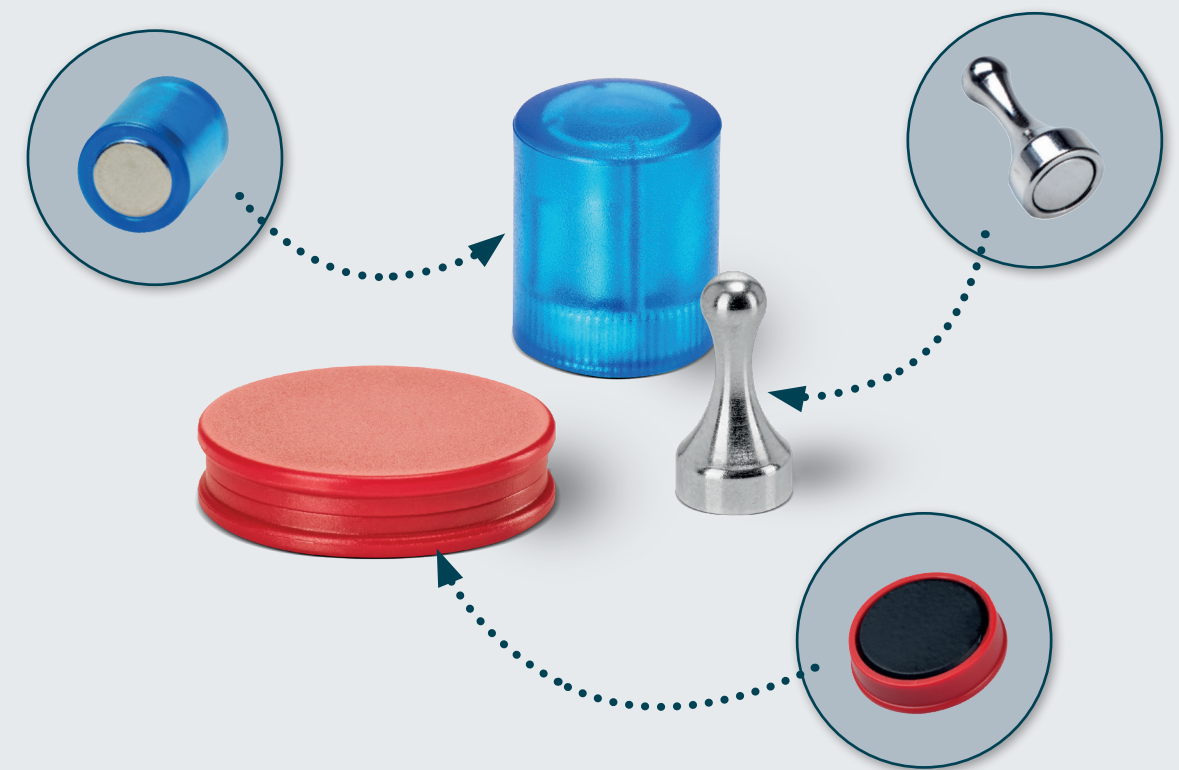

Also rectangular and square in various colors

Office magnets are magnetic systems in which the magnet fulfills its classic function as a fastener and can also be used in visible areas due to its attractive design. Organizational magnets are used, for example, in office environments, in schools or showcases and on refrigerators.

Thanks to our strong office magnets, notes and documents stay in place and can be rearranged again and again. Discover the clever magnetic aids at BRUGGER that will make your everyday life in the office and at school easier.

OFFICE MAGNETS

More order and a structured workflow!

Magnetic solutions are our expertise.

Magnets especially for stylish glass boards

A magnetic glass board impresses with its elegant look. Glassboards are available in various designs and you can magnetically attach all kinds of objects to the surface. They can also be labeled - and then easily cleaned again. However, it should be noted that magnets can only exert a fraction of their force through the glass plate on glassboards. You therefore need **super-strong neodymium magnets** to make perfect use of the glass board's functionality, as they can bear the **weight of objects that are much heavier than themselves**.

Advantages of our glassboard magnets:

- Attractive design, many colors also in transparent optics
- Easy to remove due to grip edge
- Can be used on both sides (e.g. for paper clips, ballpoint pens, scissors)
- Sturdy plastic housing on both sides to prevent scratching
- Top / bottom color mix possible

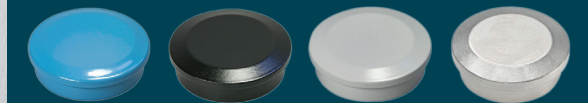

For creative wall design

With magnetic paint or magnetic plaster, walls or surfaces become an adhesive base. However, not every magnet is suitable for magnetic paint and plaster. Ferrite magnets are usually too weak to hold objects on the wall. The extra strong neodymium office magnets with a metal housing from our range are much more suitable.

They are round, nickel-plated and have the ability to bridge air gaps. This means that they can maintain a strong adhesive force even in situations where there is a small gap between the magnet and the surface.

Link to the product

Painting in other colors also possible

Extra strong - also holds on magnetic paint and plaster

Versatile classic for organization enthusiasts:

The high-quality metal strip with an elegant powder coating is available in white, black and gray. With a length of 100 cm and a width of 80 cm, our metal strips can be flexibly arranged next to or on top of each other.

The set includes 4 strong organizer magnets (diameter 30 mm) in the standard colors blue, yellow, green, orange, red, black or white made of neodymium (NdFeB).
